

COMPOST PREPARATION EQUIPMENT

GTL - Thilot Equipment Bunker Filling Machine TH.329

The bunker filling machine TH.329 is our development on the field of phase I compost preparation. Purpose built upon sturdy mechanical, electrical and hydraulic systems, this piece of equipment will suit the needs of companies looking for a cost effective, budget friendly solution for making phase I compost.

Other versions are available with larger capacities as well as diesel/generator drive systems for improved filling capacity and ease of operation.

TH.329-Start to compost now.

The hopper is made mainly of stainless steel materials combined with a heavy-duty chain.

Effective, yet simple operating platform for controlling the machine.

PASSION FOR QUALITY
