

COMPOST PREPARATION EQUIPMENT

GTL - Thilot Equipment De-Stringer SR.025

The innovative GTL-Thilot straw bale string remover SR.025 is provided with state of the art systems, freeing you from the labour intensive task of manually removing strings around straw bales. A rugged designed frame forms the base for the SR.025. In combination with the hydraulically powered drive and removal systems, this machine is set for years of trouble free operation.

An, optionally available, chain conveyor serves as a loading and feeding device for the SR.025. The integrated measuring system adjusts the blade saw and string removal device automatically, to cope with variations in height of individual bales.

The SR.025 can be used in combination with 3rd party devices.

The feed conveyor KT.025 capable of handling large quantities of straw bales, is specifically designed for operation in combination with the de-stringer SR.025.

PASSION FOR QUALITY

GTL Europe

GTL Europe is one of the foremost suppliers of equipment and projects regarding composting operations and mushroom farms. Our product line includes machines, air handling and control systems as well as turn-key facilities.

GTL Europe is a capable and reliable partner working with its customers in close cooperation on innovative solutions and developments.
