

COMPOST PREPARATION EQUIPMENT

GTL - Thilot Equipment Pre-Wet Turner PT.600

The GTL-Thilot PT.600 pre-wet turner is a high-tech powerhouse, strong, diversified, resilient- and focused on the future. Whether it is bale breaking, pre-wetting or the most demanding job of all, compost turning, our model PT.600 delivers a fast, mobile and efficient performance. In combination with an aerated floor, we give you the one and only piece of equipment needed for total compost preparation.

This robust fabricated machine forms the basis for an economic and cost effective way of compost preparation of which the compost quality will improve most.

A large pick-up drum in combination with a powerful diesel/hydraulic drive system make high capacity bale breaking and turning virtually no problem.

A wide-belt conveyor with watering devices is applied for optimum straw and compost handling. Large rubber tyres provide rapid mobility.
