

COMPOST TUNNEL EQUIPMENT

GTL - Thilot Equipment Spawn Applicator SM.250

The GTL-Thilot spawn applicator SM.250 is a simple yet reliable machine for adding spawn or supplementation to your compost. The applicator can easily be linked to the control system of the GTL-Thilot tunnel winch, making it an integrated part of the operation or it may be used as a stand-alone unit.

Its speed controller gives you a perfect and easy possibility to control the amount fed to the compost.

Extensive use of stainless steel materials combined with a distribution cone gives you the ideal tool for spawning and supplementation.

The control system is based on a electronic speed controller for precise operation.

PASSION FOR QUALITY

GTL Europe

GTL Europe is one of the foremost suppliers of equipment and projects regarding composting operations and mushroom farms. Our product line includes machines, air handling and control systems as well as turn-key facilities.

GTL Europe is a capable and reliable partner working with its customers in close cooperation on innovative solutions and developments.
