

COMPOST TUNNEL EQUIPMENT

GTL - Thilot Equipment Tunnel Emptying Winch TP.412

The model TP.412 is built for emptying 4 mtr. wide pasteurisation and spawn-running tunnels.

The designs of the 411 and 412 (long belt) series are based on a 2 or 3 spinner lay-out in combination with an auger and conveyor belt for discharge of phase II or phase III compost.

The pulling shaft is driven through a reliable clutch and heavy-duty hydraulic gear drive.

For sure, the TP.412 and our other available models will suit your needs.

TP.412-The choice of professionals!

Set-up in combination with the optional GTL-Thilot spawn and supplementation applicator.

Model TP.411-Short conveyor. Effective, yet simple operation and maintenance. Extensive use of galvanized and stainless steel materials.

PASSION FOR QUALITY

GTL Europe

GTL Europe is one of the foremost suppliers of equipment and projects regarding composting operations and mushroom farms. Our product line includes machines, air handling and control systems as well as turn-key facilities.

GTL Europe is a capable and reliable partner working with its customers in close cooperation on innovative solutions and developments.
